# PAC RAC Storage Systems

The PAC RAC system of storage helps to organize the many items needed for patient care. PAC RACs are convenient and save time by reducing clutter and managing the work area.

PAC RACs are sturdy steel construction and powder coated to prevent rusting. The open basket styling of these racks resist the collection of dust and debris, an important feature for hospital applications.

All PAC RACs are an attractive almond color and are offered in a wide variety of shapes and sizes to fill most any requirement.

A typical PAC RAC bathroom installation shows a Bed Pan Combo Basket (1054, pg. 4), Double Glove Box Holder (1091, pg. 3) and two Uri Hat Holders (1053, pg. 3).
